Wynne Harlen — *The Assessment of Scientific Literacy in the OECD/PISA Project*

Leland S. Cogan, Hsingchi A. Wang, William H. Schmidt — *Culturally Specific Patterns in the Conceptualization of the School Science Curriculum: Insights from TIMSS*

Book reviews

Glen S. Aikenhead — *Worldviews, students, science teachers, school science: where to next?*

Bambi L. Bailey — *Leading by example: a feminist science educator*

Derek Hodson — *Changing the face of school science*

Tina Jarvis — *Twenty years of science education in English primary schools*

Brian E. Woolnough — *What really happens when pupils 'do science'—and how we can find out?*

STUDIES IN SCIENCE EDUCATION
is an international review of research, policy and related issues for all who are interested in the educational dimensions of science. It is intended to complement other journals by providing reviews of research on specific aspects of science education and by drawing together, in analytical surveys, recent contributions which may be published in widely scattered locations. The journal publishes occasional pieces with an empirical or more speculative orientation. Its editorial policy is to encourage work which reflects a wide variety of view points, including those in of administration, anthropology, history, linguistics, philosophy, psychology and sociology. A website for the journal may be found at http://education.leeds.ac.uk/~edu//sse/home.htm
